ENVIRONMENTAL & OCCUPATIONAL EPIDEMIOLOGY SERIES

INVENTORY OF NEWSLETTERS
INVENTAIRE DE BULLETINS
D'INFORMATION
INVENTARIO DE BOLETINES

WORLD HEALTH ORGANIZATION, GENEVA, 1991

In support of the INTERNATIONAL PROGRAMME ON CHEMICAL SAFETY

A number of newsletters are produced by international and national agencies involved in the environmental and occupational health field. These newsletters can serve as a useful means of keeping up-to-date with recent developments in the field, new publications, training opportunities, and other activities of interest.

This inventory of newsletters provides basic information on available material in this field. The aim is to encourage and facilitate a wider distribution of these materials. The addresses of publishers of newsletters and some other brief information are given.

We plan to keep the inventory up-to-date and to include additional information in future editions. Suggestions from readers concerning material to be included would be greatly appreciated.

Additional copies available from:

*Environmental Epidemiology
Division of Environmental Health
World Health Organization
1211 Geneva, Switzerland*

INVENTORY OF NEWSLETTERS

Introduction

The aim of the inventory is to bring to readers' attention a cross-section of newsletters which are available in the field of environmental and occupational health. This first edition does not claim to be representative of all newsletters in this area, but is a short selection of valuable papers which have the advantage of often being free of charge and which also cover a large number of topics of regional or global interest.

One of the principal purposes it should serve, is to encourage the use of these information materials, but also the production of such newsletters in developing countries to suit different local requirements.

There are clear limitations to this initial attempt: most of the material is in the English language, derived from either American or European sources. In addition, only very basic information is provided on each newsletter, and no specific information on their content is given. We intend to produce a yearly update of this inventory, which should gather more titles and more complete information, and we hope that readers will help us to extend its present range by informing us of other useful newsletters in this field. We are keen to include more newsletters in French and Spanish and newsletters from developing countries that are available for international distribution. Please send a copy of the newsletter, the information included for each newsletter in this inventory, and a 500-word brief summary of the main focus of the newsletter and its target group.

Presentation

This inventory is part of a series of documents produced by WHO for the Global Environmental Epidemiology Network (GEENET). It is stored in an IBM/PC computer file using CARDBOX software and will be updated regularly.

The inventory was developed with funding from the Swedish International Development Authority (SIDA) and the Swedish Agency for Research cooperation with Developing Countries (SAREC). It was prepared in support of the International Programme on Chemical Safety. Those principally involved in the preparation of this edition are Anthony Thomas, Laurence Pollier, and Tord Kjellström, WHO Geneva.

Organization of the List

The newsletters in the database have been sorted initially in alphabetical order by title. An exclusive sorting number has then been assigned to each title, and is referred to as "List Number".

PART I

Part I previews the Master List and only presents the titles held in the inventory and their corresponding List Number.

PART II

Part II is the Master List, including a selection of information stored in the CARDBOX microcomputer file called NEWSLET. The following illustration shows what a NEWSLET record looks like on the computer screen:

```
.Editor: Editor: Barry S. Levy, M.D., M.P.H.
.Title: Environment and Health in Central and Eastern Europe
.
.Publisher: Publisher: Program on Environment and Health
.....

INVENTAIRE DE BULLETINS D'INFORMATION

Un certain nombre de bulletins d'information sont produits par des institutions internationales et nationales dont les champs d'activité sont l'hygiène de l'environnement et la médecine du travail. Ces bulletins d'information sont utiles pour se tenir au courant des faits les plus récents dans ces domaines, des publications nouvelles, des possibilités de formation et d'autres activités intéressantes.

Le présent inventaire contient des renseignements de base sur les bulletins d'information existants. Il a pour but d'encourager et de faciliter une distribution plus large de ce matériel. L'adresse de l'éditeur de chaque bulletin d'information est donnée ainsi que quelques informations succinctes.

Nous nous proposons de tenir cet inventaire à jour en y incorporant des renseignements supplémentaires dans les éditions ultérieures. Nous remercions les lecteurs qui voudront bien formuler des suggestions quant au matériel à inclure.

D'autres exemplaires peuvent être demandés à l'adresse suivante:

*Eco-Epidémiologie
Division de l'Hygiène du Milieu
Organisation mondiale de la Santé
1211 Genève, Suisse.*

INVENTAIRE DE BULLETINS D'INFORMATION

Introduction

Cet inventaire vise à attirer l'attention des lecteurs sur un échantillon des bulletins d'information qui existent dans les domaines de l'hygiène de l'environnement et de la médecine du travail. Cette première édition ne prétend pas être représentative de tous les bulletins d'information dans ces domaines, mais elle indique un assortiment de documents utiles qui ont pour avantage d'être souvent gratuits et qui, de plus, traitent d'un grand nombre de thèmes intéressants au niveau régional ou mondial.

Cet inventaire doit avoir pour but, entre autres, d'encourager l'utilisation de ce type de matériel et aussi la production dans les pays en développement de tels bulletins d'information adaptés aux besoins locaux.

Cette première tentative présente des limites manifestes car la plupart des documents sont en langue anglaise puisqu'ils proviennent de sources soit américaines, soit européennes. De plus, seules des informations tout à fait élémentaires sont fournies sur chaque bulletin d'information, aucun renseignement précis n'étant donné sur le contenu. Nous nous proposons de faire paraître chaque année une version mise à jour de cet inventaire qui devra indiquer plus de titres et des informations plus complètes et nous espérons que les lecteurs nous aideront à en élargir le champ en nous signalant d'autres bulletins d'information utiles dans ce domaine. Nous souhaiterions vivement inclure d'autres bulletins d'information en espagnol et en français, ainsi que des bulletins d'information de pays en développement qui peuvent être diffusés au niveau international. Veuillez nous faire parvenir un exemplaire du bulletin d'information avec les renseignements correspondant à ceux qui sont déjà inclus pour chaque bulletin dans le présent inventaire, ainsi qu'un bref résumé de 500 mots indiquant le thème principal du bulletin et l'auditoire visé.

Présentation

Cet inventaire fait partie d'une série de documents produits par l'OMS pour le réseau mondial d'éco-épidémiologie (GEENET). Il est enregistré dans un dossier de micro-ordinateur IBM/PC au moyen du logiciel CARDBOX et sera régulièrement mis à jour.

Cet Inventaire a été préparé avec l'appui financier de l'Agence suédoise d'Aide au Développement International (SIDA) et de l'Agence suédoise de coopération scientifique avec les pays en développement (SAREC). Il a été élaboré avec l'appui du Programme international sur la sécurité des substances chimiques. Les principaux collaborateurs à cet édition sont Anthony Thomas, Laurence Pollier et Tord Kjellström, OMS, Genève.

Organisation de la Liste

Les bulletins d'information dans la base de donnée ont été préalablement classés par ordre alphabétique par titre. Un numéro d'identification leur a alors été attribué et ce numéro est appelé "Numéro de Liste".

PARTIE I

La partie I fournit une indication préalable de la Liste principale en ne présentant que les titres enregistrés dans l'inventaire ainsi que leur Numéro de Liste correspondant.

PARTIE II

La partie II est la Liste principale, comprenant une sélection des informations enregistrés dans le dossier de micro-ordinateur CARDBOX appelé NEWSLET. On trouvera ci-dessous un exemplaire d'enregistrement NEWSLET tel qu'il apparaît sur l'écran:

```
.Editor: Editor: Barry S. Levy, M.D., M.P.H.
.Title: Environment and Health in Central and Eastern Europe
.
.Publisher: Publisher: Program on Environment and Health
.....
.Freq (No/Yr): 6 Size (pages): 6 Price:
.Language: English
.Target Group:
.....
.Focus:
.Subjects:
.
.
.
.
.Address:                               Entry Date:           Sequence No: 21
.Place: Management Sciences for Health
.Street: 165 Allandale Road              P.O. Box:
.Town: Boston                            Postcode: MA 02130
.Country:U.S.A.
.Pays:
```

Explication des champs sélectionnés:

Freq: Périodicité, nombre de numéros par an
Size: Nombre moyen de pages par numéro
Language: Langue(s) dans laquelle (ou lesquelles) paraît le bulletin
Sequence Nb: Numéro de Liste
Place, Street, POB, etc... donnent des indications sur l'adresse de l'éditeur.

Voici un exemple de la configuration d'un enregistrement de la Liste principale:

21

Title: Environment and Health in Central and Eastern Europe

INVENTARIO DE BOLETINES

Algunos organismos internacionales y nacionales que trabajan en el campo de la higiene del medio y la salud ocupacional publican boletines que pueden resultar muy útiles para estar al tanto de últimos acontecimientos en el sector, nuevas publicaciones, oportunidades de formación y otras actividades de interés.

El presente inventario de boletines proporciona información básica sobre el material disponible en este campo y tiene por objeto alentar y facilitar una distribución más amplia del mismo. En él se dan las direcciones de los editores de boletines y otros datos breves.

Tenemos la intención de mantener el inventario al día y de incluir toda nueva información en futuras ediciones. Agradeceremos mucho toda sugerencia de los lectores sobre material que pueda incluirse en el inventario.

Pueden obtenerse más ejemplares solicitándolos a:

*Epidemiología Ambiental
División de Higiene del Medio
Organización Mundial de la Salud
1211 Ginebra, Suiza.*

INVENTARIO DE BOLETINES

Introducción

La finalidad de este inventario es señalar a la atención del lector la existencia de diversos boletines sobre higiene del medio y salud ocupacional. Esta primera edición no pretende recogerlos todos, sino que constituye una breve selección de material útil, con la ventaja de ser a menudo gratuito y abarcar una gran variedad de temas de interés regional o mundial.

Uno de sus propósitos principales es estimular el uso de ese material informativo y también la producción en los países en desarrollo de boletines que se adapten a las distintas necesidades locales.

Este primer intento recopilador adolece de una limitación evidente: la mayor parte del material está en inglés, procedente de fuentes estadounidenses o europeas. Además, sólo se da la información más elemental sobre cada boletín, y ninguna información específica sobre su contenido. Tenemos la intención de publicar una versión actualizada del inventario todos los años, en la que se recogerán más títulos e información más completa, y esperamos que los lectores nos ayuden a ampliarlo informándonos de otros boletines útiles que conozcan en este campo. Nos agradecería mucho incluir más boletines en francés y en español y boletines de países en desarrollo que puedan ser objeto de distribución internacional. Les regamos envíen un ejemplar del boletín, los datos sobre cada boletín que hemos recogido en este inventario, y un breve resumen de 500 palabras sobre el tema principal del boletín y el público a quien va destinado.

Presentación

El presente inventario forma parte de una serie de documentos producidos por la OMS para la Red Mundial de Epidemiología Ambiental (GEENET). Está almacenado en un fichero de computadora IBM/PC mediante el programa CARDBOX y se actualizará periódicamente.

La recopilación fue posible gracias a los fondos donados por el Organismo Sueco de Desarrollo Internacional (OSDI) y el Organismo Sueco de Cooperación para Investigaciones con los Países en Desarrollo (SAREC). Se preparó en apoyo del Programa Internacional de Seguridad de las Sustancias Químicas. Colaboraron principalmente en la preparación de la presente edición Anthony Thomas, Laurence Pollier y Tord Kjellström, OMS, Ginebra.

Organización de la Lista

Los boletines de la base de datos se han dispuesto inicialmente por orden alfabético de los títulos. A continuación se ha asignado a cada título un número específico al que hemos llamado "Número de la Lista".

PARTE I

La parte I resume la Lista Principal y presenta solamente los títulos que contiene el inventario y su correspondiente Número de la Lista.

PARTE II

La parte II es la Lista Principal, junto con una selección de la información almacenada en el archivo informático CARDBOX denominado NEWSLET. A continuación se ilustra el aspecto de una ficha NEWSLET en la pantalla del ordenador:

```
.Editor: Editor: Barry S. Levy, M.D., M.P.H.
.Title: Environment and Health in Central and Eastern Europe
.
.Publisher: Publisher: Program on Environment and Health
.....
.Freq (No/Yr): 6 Size (pages): 6 Price:
.Language: English
.Target Group:
.....
.Focus:
.Subjects:
.
.
.
.
.Address:                               Entry Date:           Sequence No: 21
.Place: Management Sciences for Health
.Street: 165 Allandale Road              P.O. Box:
.Town: Boston                            Postcode: MA 02130
.Country:U.S.A.
.Pays:
```

Explicación de los campos seleccionados:

Freq: Frecuencia de aparición al año
Size: Número medio de páginas por número
Language: Idiomas en que se publica el boletín
Sequence Nb: Número de la Lista
Place, Street, POB, etc... indican el domicilio del editor

He aquí un ejemplo de ficha de la Lista Principal una vez impresa:
