

DISABLEMENTS AND MENTAL HEALTH

A SELECTED BIBLIOGRAPHY WITH ABSTRACTS

This bibliography provides an overview of selected publications on the consequences of diseases or disorders (impairments, disabilities, and handicaps) related to mental health. Thus, the bibliography covers literature in two major areas: (i) consequences of mental and behavioural disorders and (ii) mental health aspects of other disablements. Section A includes references related to the classification of consequences of disease or disorder. Section B includes references related to the assessment and measurement of disablements in the field of mental health. Section C includes references on the application of the concept of disablements in different settings. The abstracts included appear as they were originally abstracted by the authors unless otherwise noted.
