PROJET DE RECHERCHE SUR LA PHARMACOVIGILANCE INTERNATIONALE¹

LISTE DES DENOMINATIONS COMMUNES² DES PREPARATIONS PHARMACEUTIQUES
SOUPÇONNÉES DE PROVOQUER DES REACTIONS ADVERSES

N° 1 Genève, 1er novembre 1971

On trouvera ci-joint une liste de 1926 agents thérapeutiques, désignés par leurs dénominations communes, qui ont été inscrits dans les dossiers du projet OMS pour avoir été soupçonnés de provoquer des réactions adverses dans 27 489 rapports reçus par l'Organisation de mars 1968 à octobre 1971.

Les sources de renseignements sont les centres nationaux de pharmacovigilance des pays suivants : Australie, Canada, Danemark, États-Unis d'Amérique, Irlande, Nouvelle-Zélande, Norvège, Pays-Bas, République fédérale d'Allemagne, Royaume-Uni, Suède et Tchécoslovaquie.

Note : Après le nom de chaque médicament, l'indication N ou K signifie : substance signalée uniquement comme médicament simple; *N : substance signalée à la fois comme médicament simple et comme ingrédient d'une composition; C : substance signalée uniquement comme ingrédient d'une composition.

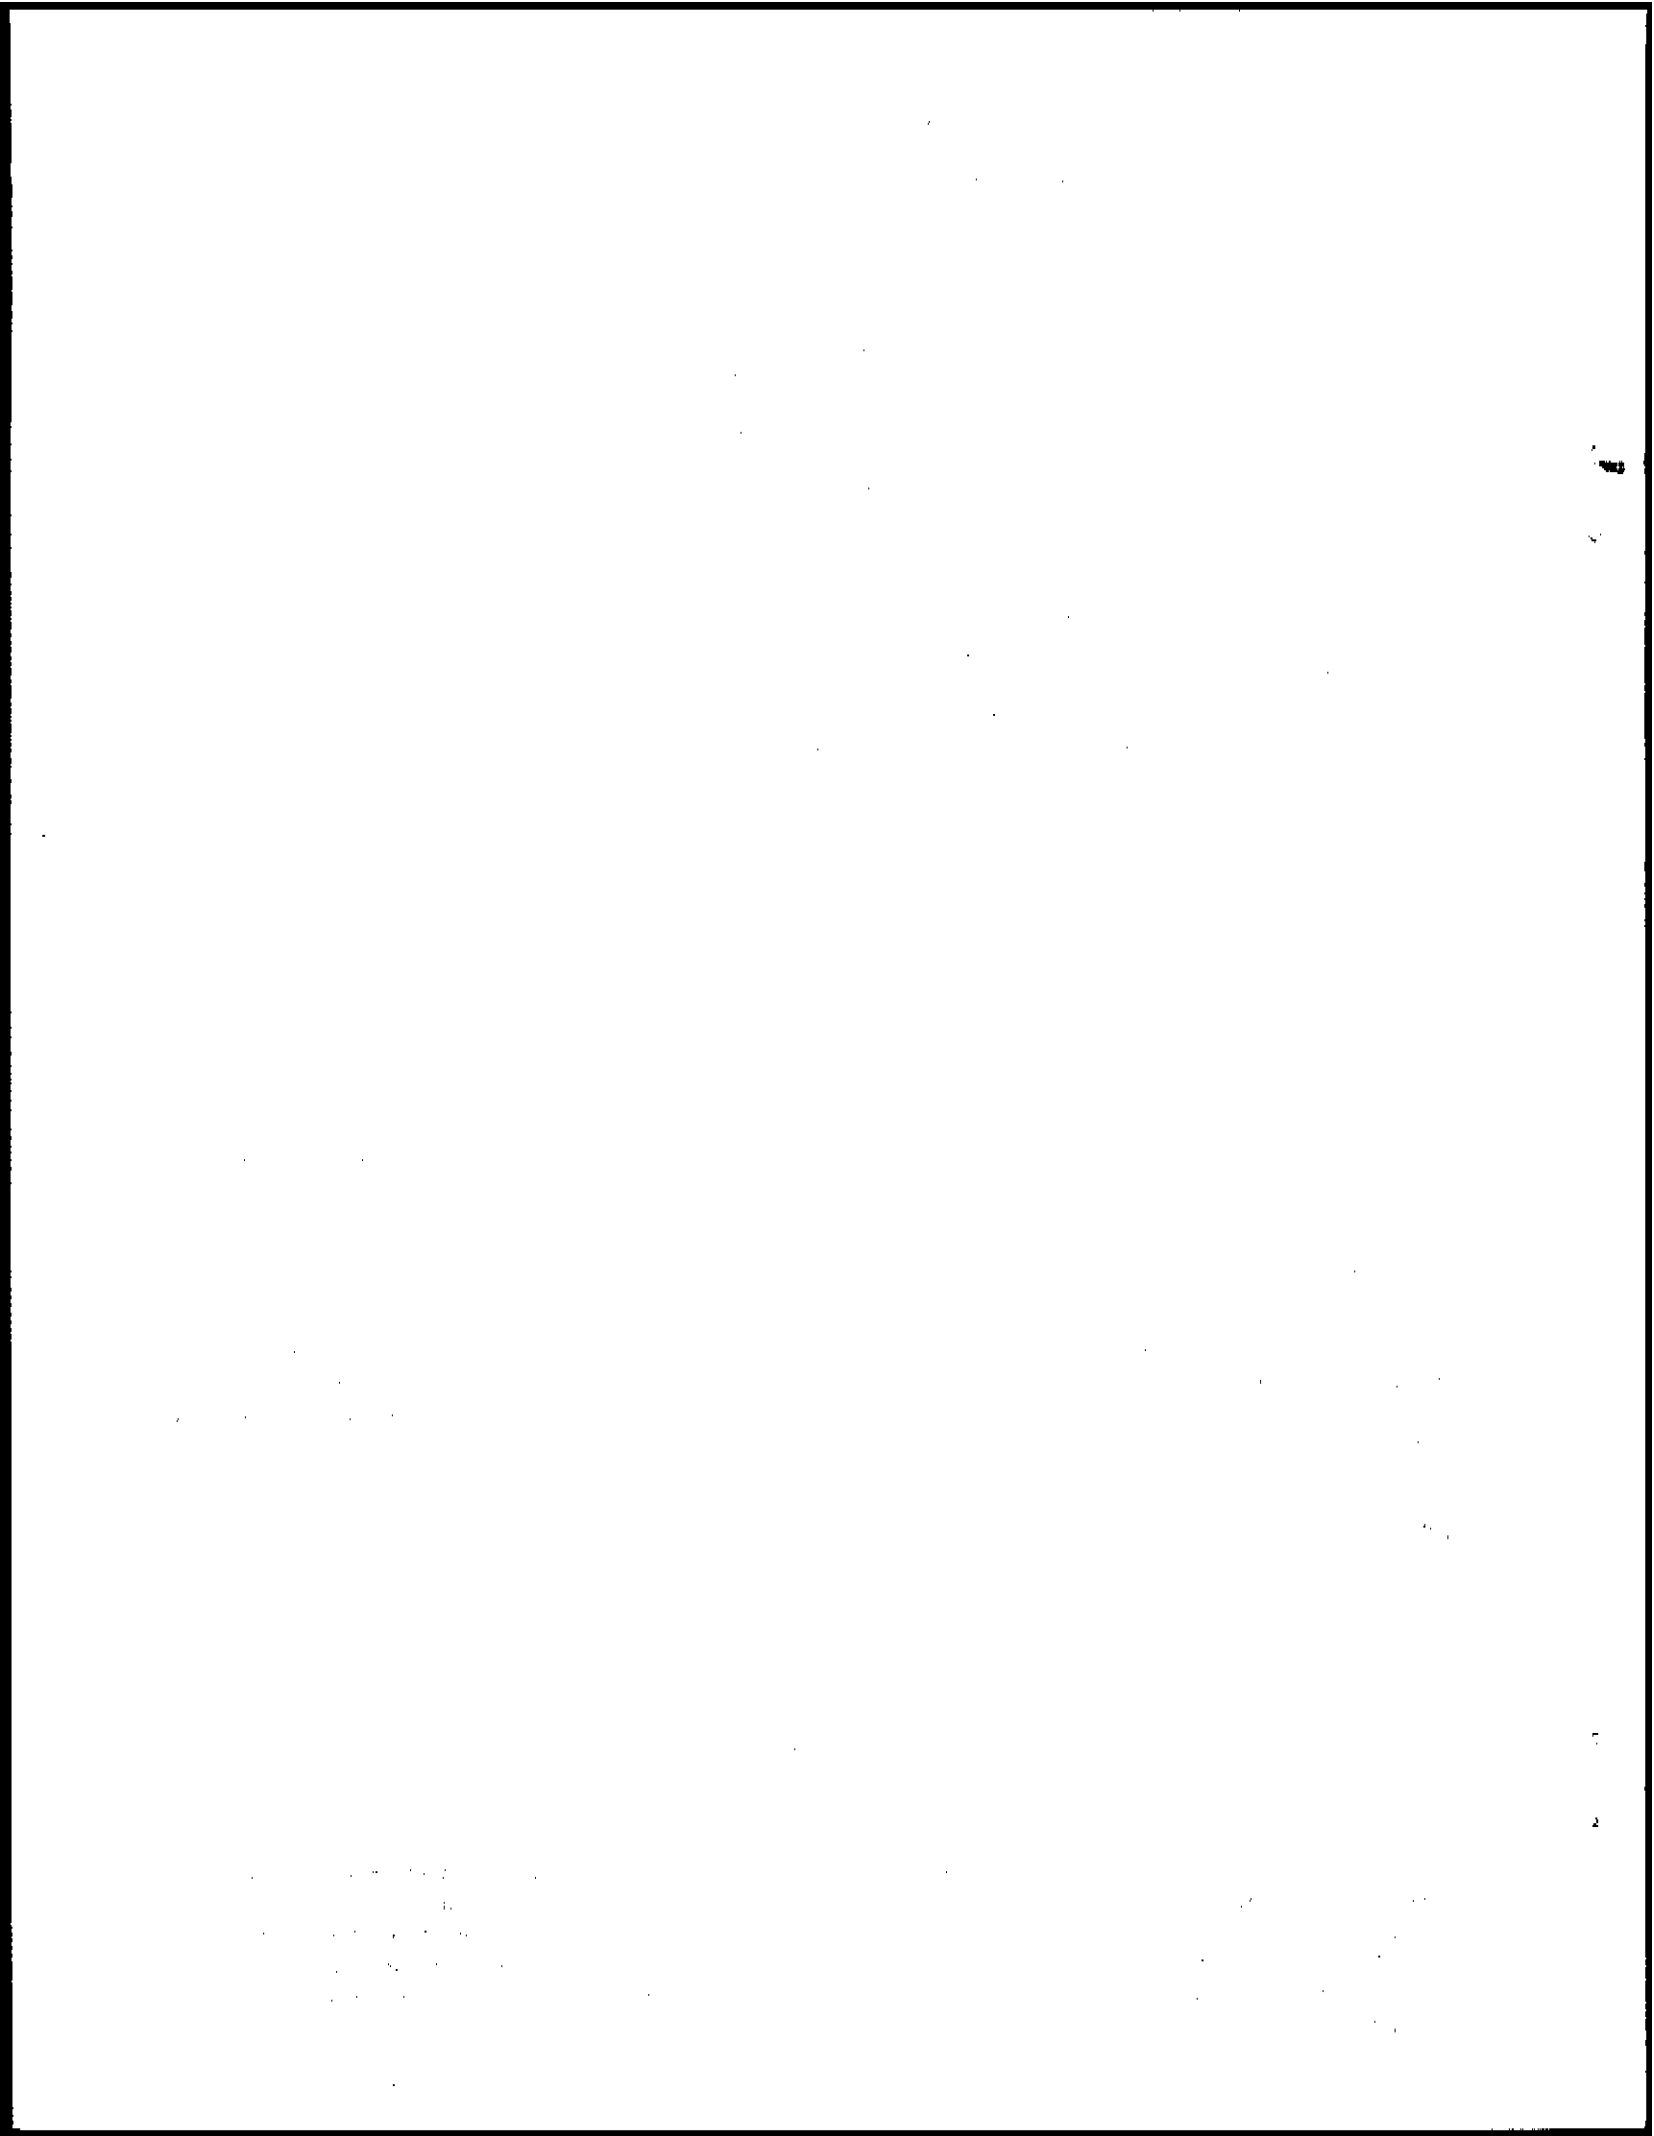

-> DMO/71.6

¹ Actes off. Org. mond. Santé, 1970, 184, annexe 8.

² Principalement les dénominations communes internationales.
