The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either express or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

For reasons of space, the names of Member States are sometimes shortened in certain figures.

Cover: Gross national income per capita of 19 high-burden countries compared with the proportion of funds for TB control that is provided by their governments (rather than by donor agencies). Countries with a higher average income per capita tend to contribute more to the cost of TB control. The financial contributions made by governments will be crucial to the success of *The Global Plan to Stop TB, 2006–2015*. The data are presented in detail in Figure 33 of the main text.
