The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the American Cancer Society concerning the legal status of any country, territory, city or area of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines, for which there may not yet be full agreement. The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the American Cancer Society in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters. The American Cancer Society does not warrant that the information contained in this publication is complete and correct and shall not be liable for any damages incurred as a result of its use. The authors alone are responsible for the views expressed in this publication.

CONTENTS

Forewords	8	6 Infection	32
John R Seffrin, CEO, American Cancer Society		Prevalence of infection with <i>Helicobacter pylori</i> in adults by world region. World cancer burden caused by infections. Infection as a cause of cancer.	
Julie L Gerberding, Director, Centers for Disease Control and Prevention, USA			
Peter Boyle, Director, International Agency for Research on Cancer, WHO			
Preface	11	7 Diet and nutrition	34
Acknowledgements	12	Prevalence of overweight in men. Strength of evidence on physical activity and dietary factors. Meat consumption per person. Dietary recommendations for reducing the risk of cancer.	
Photo credits	14	8 Ultraviolet radiation	36
About the authors	15	Mean annual UV radiation level. Geographic variation and time trends in incidence of malignant melanoma of the skin.	
Glossary	16	9 Reproductive and hormonal factors	38
Part One: INTRODUCTION		Average number of births during a woman's lifetime. Effect of oral contraceptives, hormone replacement therapy, childbearing and breastfeeding on the risk of breast cancer. Trends in oral contraceptive use.	
1 Mechanism of tumour development	20		
How a tumour develops. How a tumour spreads. Stage and prognosis of cancer.		Part Three: THE BURDEN	
Part Two: RISK FACTORS		10 The risk of getting cancer	42
2 Risk factors	24	The probability of developing cancer before age 65. Age-specific incidence of four cancers in the Nordic countries. Sex-ratios of selected cancers in developed countries.	
Proportion of cancers caused by major risk factors. Modifiable, non-modifiable and other risk factors. Trends in obesity among South American women. Obesity and income, Canada and the USA.		11 Major cancers	44
3 Risks for boys	26	The most common cancers in males and females. Sex differences in new cancer cases. Differences in new cancer cases between developed and developing countries.	
Prevalence of smoking among 15-year-old male students. Use of other tobacco products among 13-15-year-old boys in Africa. Percentage of 15-year-old boys who are overweight.		12 Geographical diversity	46
4 Risks for girls	28	Global differences in incidence of cancer of the liver, oesophagus and testis in men, and breast, stomach and cervix in women.	
Prevalence of smoking among 15-year-old female students. Use of other tobacco products among 13-15-year-old girls in Africa. Percentage of 15-year-old girls who are overweight.		13 Lung cancer	48
5 Tobacco	30	Global differences in incidence of lung cancer in men and women. Trends in lung cancer mortality rates. Trends in lung cancer survival in men in Scotland and USA.	
Prevalence of smoking among adults by sex. Cancer deaths caused by smoking. Cancers caused by tobacco compared with all new cases.			

14 Cancer in children 50

The most common cancers of children. Trends in the incidence and survival of major cancers of childhood in Europe.

15 Cancer survivors 52

Five-year cancer survivors as a proportion of national population. Relay For Life. Number of cancer survivors by years since diagnosis in USA.

Part Four: ECONOMICS

16 Economic costs 56

Trends in cancer-related direct costs as a percentage of all healthcare costs. The price of cigarettes as a percentage of Gross Domestic Product (GDP). The cost of treating obesity. The cost-effectiveness of prevention. The costs of treating cancer.

17 Commercial interests 58

Industries that contribute to the prevention, diagnosis and treatment of cancer. Biomedical research funding, USA. Countries benefiting from funding by Avon Breast Cancer Crusade. Profits from tobacco filed by the leading transnational tobacco companies.

Part Five: TAKING ACTION

18 Cancer registries 62

Countries with cancer registries included in *Cancer in Five Continents*, Vol VIII. Membership of the International Association of Cancer Registries. Availability of statistics on cancer incidence.

19 Research 64

Cancer research spending by charities and governments. Studies in the International Cancer Research Portfolio database. Study protocols of the European Organization for Research and Treatment of Cancer. Comparative funding for research at the US National Institutes of Health. Number of currently funded clinical trials.

20 Primary prevention 66

Percentage coverage of hepatitis B vaccination among infants. The percentage risk of death from lung cancer for smokers and non-smokers. Date of legislation for nutritional labelling regulations.

21 Prevention: population and systems approaches 68

Numbers of physicians working in noncommunicable disease control. Effect of cervical cancer screening programmes. Effectiveness of measures to prevent smoking in young people. Percentage of local-government authority pools with shade structures in Victoria, Australia.

22 Early detection 70

Cervical cancer screening programmes. Participation in organized mammography screening programmes. Public awareness of screening programmes for colorectal cancer in Europe.

23 Management and treatment 72

Availability of treatment: radiotherapy centres. Costs of promoting cigarettes compared with the cost of buying radiotherapy machines. Trends in breast cancer surgery in the USA.

24 Cancer organizations 74

Member organizations of the International Union Against Cancer. Types and functions of cancer organizations. Example of a beneficial alliance in Venezuela. The Charter of Paris, 2000. UICC World Cancer Congresses.

25 Health education 76

World cancer days. International Childhood Cancer Day. World No Tobacco Day. Quit&Win campaign.

26 Policies and legislation 78

WHO Framework Convention on Tobacco Control. Cancer programmes by region. Tobacco, food and nutrition legislation by region.

Part Six: THE FUTURE & THE PAST

27 The future 82

The cancer epidemic, risk factors, and action, projected to 2030. New cancer cases by WHO region.

The history of cancer 84

From the early description of cancer thousands of years ago to the present day: landmarks in first descriptions, diagnosis and treatment, establishment of organizations, identification of risk factors, conferences and action taken.

Part Seven: WORLD TABLES

Table A: Risk factors for cancer 92

Prevalence of youth and adult smoking, and of overweight.

Table B: Statistics on cancer 100

The risk of getting cancer. Cancer survivors. Primary prevention. Incidence of cancer by sex.
