NOTES SUR LES UNITÉS GÉOGRAPHIQUES

NOTE ON GEOGRAPHIC AREAS

Il ne faudrait pas conclure de la présentation adoptée dans le *Relevé épidémiologique hebdomadaire* que l'Organisation Mondiale de la Santé approuve ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.

The form of presentation in the *Weekly Epidemiological Record* does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.

INFORMATIONS ÉPIDÉMIOLOGIQUES — EPIDEMIOLOGICAL NOTES

GRIPPE

Amérique

Canada. — Au 25 février, aucune poussée épidémique n'avait été signalée et aucun virus grippal n'avait été isolé.

Europe

Malte. — Une poussée de grippe A, dont l'intensité n'est pas encore connue, est signalée à Malte.

Royaume-Uni. — L'épidémie de grippe décroît rapidement en Angleterre et au Pays de Galles: le nombre des décès attribués à cette maladie, après avoir atteint un maximum (1400) pendant la semaine terminée le 11 février, est tombé à 973 la semaine suivante et à 568 pendant la semaine terminée le 25 février.

INFLUENZA

America

Canada. — Up to 25 February, no influenza virus isolations have been reported in Canada and no reports have been received of epidemic outbreaks.

Europe

Malta. — An outbreak of virus A influenza, the extent of which is not yet known, has occurred in Malta.

United Kingdom. — In England and Wales the influenza epidemic is decreasing rapidly. The number of deaths reached a maximum of 1400 in the week-ending 11 February; they fell to 973 in the week-ending 18 February and 568 in the week-ending 25 February.

PESTE EN 1960

Amérique

Depuis la parution de la récente note consacrée à la répartition de la peste dans le monde,¹ des informations complémentaires ont été reçues qui modifient les données relatives à deux Etats d'Amérique du Sud, Brésil et Pérou.

Au Brésil, 12 nouveaux cas constatés en novembre et décembre portent le total pour ce pays à 28 cas. Ces nouveaux cas se répartissent ainsi:

Etat de Bahia:

| | |
|----------------------|--------------------|
| Andaraí Dep. | 3, soit 5 au total |
| Ibitiara Dep. | 2, soit 4 au total |
| Piata Dep. | 2 |
| Santa Teresinha Dep. | 1 |
| Seabra Dep. | 1 |

Etat de Rio de Janeiro:

| | |
|------------------|---|
| Teresopolis Dep. | 2 |
|------------------|---|

Etat d'Alagoas:

| | |
|--------------------|---|
| Major Izidoro Dep. | 1 |
|--------------------|---|

Au Pérou, 6 cas supplémentaires constatés en décembre portent le total pour ce pays à 134 cas en 1960. Ils ont été observés dans le district de Canchaque, province de Huancabamba; le nombre des cas signalés dans cette province en 1960 passe donc à 112 (au lieu de 106).

¹ Voir REH 1961, N° 2, pp. 84-85.

PLAGUE IN 1960

America

After the recent publication of a note about the distribution of plague throughout the world,¹ additional data have been received, which call for a change in the information given for two South American countries, namely Brazil and Peru.

In Brazil, 12 further cases of plague were recorded in November and December, thus making a total of 28 cases. The new cases are distributed as follows:

Bahia State:

| | |
|----------------------|--------------|
| Andaraí Dep. | 3 (total: 5) |
| Ibitiara Dep. | 2 (total: 4) |
| Piata Dep. | 2 |
| Santa Teresinha Dep. | 1 |
| Seabra Dep. | 1 |

Rio de Janeiro State:

| | |
|------------------|---|
| Teresopolis Dep. | 2 |
|------------------|---|

Alagoas State:

| | |
|--------------------|---|
| Major Izidoro Dep. | 1 |
|--------------------|---|

In Peru, 6 additional cases were observed in December, bringing the total for this country to 134 cases in 1960. They occurred in the district of Canchaque, Huancabamba Province. Therefore the number of cases reported in this province in 1960 is 112 (instead of 106).

¹ See WER 1961, No. 2, pp. 84-85.

INFORMATIONS ÉPIDÉMIOLOGIQUES (*suite*) — EPIDEMIOLOGICAL NOTES (*continued*)

VARIOLE

Une fillette de quatre ans, venant de Bombay par TWA (vol 809), atterrit à Rome le 26 janvier et poursuivit sur Madrid par Alitalia (vol 347) où elle arriva le 27 janvier. Reconnue atteinte de variole le 6 février, elle fut immédiatement isolée à l'Hôpital del Rey où elle mourut le 17. Entre temps, les contacts possibles en Espagne avaient été recherchés, vaccinés ou placés sous surveillance sanitaire; les autorités sanitaires en Italie et au Maroc avaient été prévenues, de manière à leur permettre de prendre les mesures nécessaires. L'OMS fut informée le 22 février; elle prévint à son tour par poste aérienne les autorités sanitaires intéressées. Le premier cas secondaire fut diagnostiqué le 21 février. L'Organisation fut informée par télégramme le 24. Les autorités sanitaires intéressées furent promptement mises au courant par télégramme et l'information fut diffusée par le radio bulletin épidémiologique quotidien dès le 25 février. Madrid devenait ainsi une « circonscription infectée » de variole à partir du 21. Pendant la semaine terminée le 4 mars, treize nouveaux cas furent signalés à Madrid. Aucun autre cas de variole n'a été signalé parmi les contacts de la fillette de quatre ans en provenance de Bombay.

SMALLPOX

A girl aged four, coming from Bombay by TWA (flight 809), landed in Rome on 26 January and proceeded to Madrid by Alitalia (flight 347) where she arrived on 27 January. Smallpox was diagnosed on 6 February and the girl was isolated immediately at the Hospital del Rey where she died on 17 February. Meanwhile, all possible contacts in Spain were sought out, vaccinated or placed under surveillance; the health administrations in Italy and Morocco were informed to enable them to take necessary measures. WHO was notified on 22 February. The Organization informed all interested health administrations by airmail. The first secondary case was diagnosed on 21 February; the Organization was notified by telegram on 24 February. Interested health administrations were promptly informed by telegram and the information appeared in the daily epidemiological radio Bulletin beginning 25 February. Madrid became a smallpox-infected local area as of 21 February. During the week ending 4 March, 13 additional secondary cases were reported in Madrid. No other secondary cases, contacts of the girl aged four coming from Bombay, have been reported.
