Territoires infectés au 24 janvier 1963 — Infected areas as on 24 January 1963

Notifications reçues aux termes du Règlement sanitaire international concernant les circonscriptions infectées ou les territoires où la présence de maladies quaranténaires a été signalée (voir page 8).

* = Circonscriptions ou territoires notifiés aux termes de l'article 3 à la date donnée.

Autres territoires où la présence de maladies quaranténaires a été notifiée aux termes des articles 4, 5 et 9 a):

A = pendant la période indiquée sous le nom de chaque maladie;
B = antérieurement à la période indiquée sous le nom de chaque maladie;

* = territoires nouvellement infectés.

Notifications received under the International Sanitary Regulations relating to infected local areas and to areas in which the presence of quarantinable diseases was reported (see page 8).

* = Areas notified under Article 3 on the date indicated.

Other areas in which the presence of quarantinable diseases was notified under Articles 4, 5 and 9 (a):

A = during the period indicated under the heading of each disease;
B = prior to the period indicated under the heading of each disease;

* = newly infected areas.

BULLETIN ÉPIDÉMIOLOGIQUE RADIO-TÉLÉGRAPHIQUE QUOTIDIEN DE L'OMS

DAILY EPIDEMIOLOGICAL RADIO-TELEGRAPHIC BULLETIN OF WHO

L'Organisation mondiale de la Santé, à Genève, transmet par l'intermédiaire des postes émetteurs de Radio Suisse S.A. (Genève-Prangins), un *Bulletin épidémiologique radio-télégraphique quotidien* destiné aux administrations sanitaires. Ce bulletin contient les renseignements officiels reçus par l'OMS, à Genève, sur les cas de maladies quaranténaires, c'est-à-dire de peste, choléra, fièvre jaune, variole, typhus et fièvre récurrente, constatés dans les ports et les aéroports (section une); sur les déclarations de circonscriptions infectées; sur les déclarations de circonscriptions redevenues indemnes lorsqu'il s'agit a) d'un port ou d'un aéroport; b) de la dernière circonscription qui restait encore infectée par une maladie quarantenaire donnée, dans un pays (section deux); sur les cas de maladies quaranténaires constatés dans des localités autres que ports et aéroports (section trois); et enfin sur les épidémies de maladies non quaranténaires ayant un intérêt international suffisant (section quatre).

Les derniers renseignements reçus suivis des mots « fin des dernières informations » sont communiqués au début du message, afin de réduire les frais de réception des administrations sanitaires. Lorsqu'il n'y a pas de changement, le mot « répétition » précède le texte du bulletin.

Le bulletin est un complément au *Relevé épidémiologique hebdomadaire*.

Les conditions de réception du bulletin, ainsi que toutes observations et suggestions opportunes au sujet de sa teneur, seront signalées au Service de la Quarantaine Internationale, OMS, Genève (adresse télégraphique: EPIDNATIONS GENEVE).

Les postes émetteurs de Genève-Prangins qui transmettent le *Bulletin épidémiologique radio-télégraphique de l'OMS*, de même que les postes émetteurs retransmettant ce Bulletin, sont indiqués à la page 10.

The World Health Organization transmits over the Radio Suisse S.A. wireless station (Genève-Prangins) a *Daily Epidemiological Radio-telegraphic Bulletin* destined for health administrations. This bulletin contains official information received by WHO in Geneva on the occurrence of the quarantinable diseases, i.e. plague, cholera, yellow fever, smallpox, typhus and relapsing fever, in ports and airports (section one); on declarations of areas as infected or free from infection—declarations of areas free from infection are included only if (a) the area is a port or airport, or (b) the area is the last infected area for that particular disease in that country (section two); on cases of the quarantinable diseases in localities other than ports and airports (section three); and on outbreaks of non-quarantinable diseases, if of sufficient international interest (section four).

The "latest information", followed by the words "end of latest information" is given at the beginning of the message, in order to reduce the cost of reception to health administrations. Whenever the text is not modified the word "repetition" is given at the beginning of the message.

The Bulletin complements the *Weekly Epidemiological Record*.

Reports on conditions of reception, and any comments and suggestions regarding the contents of the bulletin, should be communicated to the International Quarantine Service WHO, Geneva (cable address: EPIDNATIONS GENEVA).

The Genève-Prangins stations transmitting the *Daily Epidemiological Radio-telegraphic Bulletin of WHO*, as well as those stations retransmitting this Radio Bulletin, are listed on page 10.

INFORMATIONS ÉPIDÉMIOLOGIQUES — EPIDEMIOLOGICAL NOTES

GRIPPE

INFLUENZA

Europe

Europe

Pays-Bas. — Environ 20 cas d'une affection d'allure grippale ont été observés dans un institut pour les maladies mentales près d'Utrecht.

Le test d'inhibition de l'hémagglutination, pratiqué sur les sérums couplés de 2 malades, a fait supposer que le virus A2 était en cause.

Il n'y a actuellement aucun signe d'expansion générale aux Pays-Bas.

Netherlands. — About 20 cases of clinical influenza were observed in an institute for mental diseases near Utrecht.

Hemagglutination inhibition test in paired sera obtained from 2 patients seems to indicate that Virus A2 is responsible.

There is no sign of a general spread of the outbreak in the Netherlands.

NOTES SUR LES UNITÉS GÉOGRAPHIQUES — NOTE ON GEOGRAPHIC AREAS

Il ne faudrait pas conclure de la présentation adoptée dans le *Relevé épidémiologique hebdomadaire* que l'Organisation Mondiale de la Santé admet ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.

The form of presentation in the *Weekly Epidemiological Record* does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.
