NOTES SUR LES UNITÉS GÉOGRAPHIQUES — NOTE ON GEOGRAPHIC AREAS

<p>Il ne faudrait pas conclure de la présentation adoptée dans le <i>Relevé épidémiologique hebdomadaire</i> que l'Organisation Mondiale de la Santé admet ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.</p>	<p>The form of presentation in the <i>Weekly Epidemiological Record</i> does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.</p>

RÈGLEMENT SANITAIRE INTERNATIONAL — INTERNATIONAL SANITARY REGULATIONS

Mesures sanitaires concernant le choléra

Etant donné le nombre de circonscriptions actuellement infectées de choléra en Asie, certaines dispositions du Règlement sanitaire international sont reproduites ci-après, dans le but de rappeler les mesures sanitaires contre le choléra que les Etats parties au Règlement ont acceptées comme constituant le maximum de ce qu'ils exigeront dans le trafic international. Les Etats sont, de plus, tombés d'accord pour que les mesures et les formalités sanitaires soient commencées immédiatement, terminées sans retard et appliquées sans discrimination. Les Etats ayant formulé des réserves, acceptées par l'Assemblée mondiale de la Santé, ont certains droits supplémentaires.

Article 69

1. Nul ne peut être astreint à un prélèvement rectal.
2. Seule une personne effectuant un voyage international et qui, arrivant, pendant la période d'incubation du choléra, d'une circonscription infectée, présente des symptômes qui permettent de soupçonner cette maladie, peut être astreinte à un examen de selles.

Article 62

1. Un navire est considéré comme infecté si, à l'arrivée, il y a un cas de choléra à bord, ou si un tel cas s'est déclaré à bord pendant les cinq jours précédant l'arrivée.
2. Un navire est considéré comme suspect s'il y a eu un cas de choléra à bord pendant le voyage, pourvu qu'aucun cas nouveau ne se soit déclaré pendant les cinq jours précédant l'arrivée.
3. Un aéronef est considéré comme infecté si, à l'arrivée, il y a un cas de choléra à bord. Il est considéré comme suspect si, un cas de choléra s'étant déclaré à bord pendant le voyage, la personne atteinte a été débarquée à une escale antérieure.
4. Bien que provenant d'une circonscription infectée ou ayant à bord une personne en provenance d'une circonscription infectée, un navire ou aéronef est considéré à l'arrivée comme indemne si, à la visite médicale, l'autorité sanitaire a pu s'assurer qu'il n'y a pas eu de choléra à bord pendant le voyage.

Article 63

1. A l'arrivée d'un navire ou aéronef infecté, l'autorité sanitaire peut appliquer les mesures suivantes:
 - (a) pendant cinq jours au plus à compter de la date du débarquement, surveillance des passagers ou membres de l'équipage munis d'un certificat valable de vaccination contre le choléra et isolement de toutes autres personnes quittant le bord;
 - (b) désinfection:
 - i) des bagages des personnes atteintes ou des suspects;
 - ii) de tout autre objet, tel que literie et linge ayant servi, et de toute partie du navire ou de l'aéronef, qui sont considérés comme contaminés;
 - (c) désinfection et évacuation des réserves d'eau du bord qui sont considérées comme contaminées, et désinfection des réservoirs.
2. Il est interdit de laisser s'écouler, de verser ou de jeter des déjections humaines, des eaux, y compris les eaux de cales, et des matières résiduelles, ainsi que toute matière considérée comme contaminée, si ce n'est après désinfection préalable. L'autorité sanitaire est responsable de la bonne exécution de toute évacuation de cette nature.

Cholera sanitary measures

In view of the number of local areas now infected with cholera in Asia, some provisions of the International Sanitary Regulations are quoted below to recall certain cholera sanitary measures which States, legally bound by these Regulations, have agreed are the maximum measures they will apply to international traffic. States have further agreed that sanitary measures and health formalities will be initiated forthwith, completed without delay, and applied without discrimination. Those States which have World Health Assembly accepted reservations have certain additional rights.

Article 69

1. No person shall be required to submit to rectal swabbing.
2. Only a person on an international voyage, who has come from an infected local area within the incubation period of cholera and who has symptoms indicative of cholera, may be required to submit to stool examination.

Article 62

1. A ship shall be regarded as infected if, on arrival, it has a case of cholera on board, or if a case of cholera has occurred on board during a period of five days before arrival.
2. A ship shall be regarded as suspected if a case of cholera has occurred on board during the voyage, but a fresh case has not occurred during a period of five days before arrival.
3. An aircraft shall be regarded as infected if, on arrival, it has a case of cholera on board. It shall be regarded as suspected if a case of cholera has occurred on board during the voyage but the case has previously been disembarked.
4. Even when coming from an infected local area or having on board a person coming from an infected local area, a ship or an aircraft on arrival shall be regarded as healthy if, on medical examination, the health authority is satisfied that no case of cholera has occurred on board during the voyage.

Article 63

1. On arrival of an infected ship or aircraft, the following measures may be applied by the health authority:
 - (a) for a period of not more than five days, reckoned from the date of disembarkation, surveillance of any passenger or member of the crew who produces a valid certificate of vaccination against cholera, and isolation of all others who disembark;
 - (b) disinfection of—
 - (i) any baggage of any infected person or suspect, and
 - (ii) any other article such as used bedding or linen, and any part of the ship or aircraft, which is considered to be contaminated;
 - (c) disinfection and removal of any water carried on board which is considered to be contaminated, and disinfection of the containers.
2. Human dejecta, waste water including bilge-water, waste matter, and any matter which is considered to be contaminated, shall not be discharged or unloaded without previous disinfection. Their safe disposal shall be the responsibility of the health authority.

Article 64

1. A l'arrivée d'un navire ou aéronef suspect, les mesures prescrites aux lettres b) et c) du paragraphe 1 ainsi qu'au paragraphe 2 de l'article 63 peuvent lui être appliquées par l'autorité sanitaire.

2. En outre, et sans préjudice des mesures visées à la lettre b) du paragraphe 3 de l'article 61, les passagers ou membres de l'équipage quittant le bord peuvent être soumis à une surveillance pendant cinq jours au plus à compter de la date d'arrivée.

Article 65

Le navire ou aéronef cesse d'être considéré comme infecté ou suspect quand les mesures prescrites par l'autorité sanitaire, conformément à l'article 38 et aux articles 63 et 64 selon le cas, ont été dûment exécutées. Le navire ou l'aéronef est dès lors admis à la libre pratique.

Article 66

A l'arrivée, un navire ou aéronef indemne est admis à la libre pratique. Toutefois, s'il provient d'une circonscription infectée, l'autorité sanitaire peut appliquer aux passagers et aux membres de l'équipage quittant le bord les mesures prescrites par l'article 61.

Article 1

« Visite médicale » comprend la visite et l'inspection du navire, aéronef, ... ainsi que l'examen préliminaire des personnes se trouvant à bord,

L'« examen préliminaire » peut comprendre la visite corporelle de quelque personne que ce soit. ... (Actes off. Org. mond. santé, 56, 46).

Article 100

Aucun document sanitaire autre que ceux visés au présent Règlement ne peut être exigé dans le trafic international.

Il y a lieu de noter, en particulier, les dispositions de l'article 69; seuls les voyageurs internationaux arrivant dans les cinq jours d'une circonscription infectée de choléra et qui, de plus, présentent des symptômes permettant de soupçonner cette maladie, peuvent être soumis à un examen de selle; les autorités sanitaires n'ont pas le droit d'exiger que d'autres voyageurs internationaux soient soumis à un examen de selle.

Il y a lieu de noter également les dispositions de l'article 34 précisant qu'« aucune mesure sanitaire, autre que la visite médicale, n'est imposée aux passagers et membres de l'équipage ... se trouvant sur un navire indemne, qui ne quittent pas le bord » et « aux passagers et membres de l'équipage ... en transit, se trouvant à bord d'un aéronef indemne » et qui demeurent en transit ou se soumettent aux mesures prescrites pour le trafic de transit.

C'est à dessein que le Règlement sanitaire international ne mentionne pas les « porteurs de germes »; on sait que les mesures sanitaires prévues par le Règlement ne peuvent leur être appliquées.

Article 64

1. On arrival of a suspected ship or aircraft, the measures provided for in sub-paragraphs (b) and (c) of paragraph 1 and in paragraph 2 of Article 63 may be applied by the health authority.

2. In addition, but without prejudice to the measures provided for in sub-paragraph (b) of paragraph 3 of Article 61, any passenger or member of the crew who disembarks may be placed under surveillance for a period of not more than five days, reckoned from the date of arrival.

Article 65

A ship or an aircraft shall cease to be regarded as infected or suspected when the measures required by the health authority in accordance with Article 38 and with Articles 63 and 64 respectively have been effectively carried out. The ship or aircraft shall thereupon be given free pratique.

Article 66

On arrival, a healthy ship or aircraft shall be given free pratique but, if it has come from an infected local area, the health authority may apply to any passenger or member of the crew who disembarks the measures provided for in Article 61.

Article 1

„Medical examination” includes visit to and inspection of a ship, an aircraft, ... and the preliminary examination of persons on board

„Preliminary examination” may include the physical examination of any person. ... (Off. Rec. Wld Hlth Org. 56, 46.)

Article 100

No sanitary document, other than those provided for in these Regulations, shall be required in international traffic.

Attention is invited especially to the provisions of Article 69; only those international travellers who come from a cholera infected local area within 5 days and in addition have symptoms indicative of cholera may be required to submit to stool examination; health authorities do not have the right to require other international travellers to submit to stool examination.

Attention is invited to the provisions of Article 34 which state in part that „no sanitary measure, other than medical examination, shall be applied to passengers and crew on board a healthy ship from which they do not disembark (and) passengers and crew from a healthy aircraft who are in transit” and who remain or submit to stated transit arrangements.

It is to be noted that the International Sanitary Regulations have deliberately made no reference to „cholera carriers”; sanitary measures provided for in these Regulations may not, as is well known, be applied to „cholera carriers”.
