RELEVÉ ÉPIDÉMIOLOGIQUE HEBDOMADAIRE WEEKLY EPIDEMIOLOGICAL RECORD

Notifications et informations se rapportant à l'application
du Règlement sanitaire international et notes relatives à la
fréquence de certaines maladies

Service de la Quarantaine internationale
Adresse télégraphique: EPIDNATIONS, GENÈVE

Notifications under and information on the application of the
International Sanitary Regulations and notes on current incidence
of certain diseases

International Quarantine Service
Telegraphic address: EPIDNATIONS, GENEVA

21 AOÛT 1964

39^e ANNÉE — 39th YEAR

21 AUGUST 1964

MALADIES QUARANTENAIRES — QUARANTINABLE DISEASES

Territoires infectés au 20 août 1964 — Infected areas as on 20 August 1964

Notifications reçues aux termes du Règlement sanitaire international
concernant les circonscriptions infectées ou les territoires où la présence
de maladies quaranténaires a été signalée (voir page 414).

■ = Circonscriptions ou territoires notifiés aux termes de l'article 3 à la
date donnée.

Autres territoires où la présence de maladies quaranténaires a été notifiée
aux termes des articles 4, 5 et 9 a):

A = pendant la période indiquée sous le nom de chaque maladie;
B = antérieurement à la période indiquée sous le nom de chaque maladie;
* = territoires nouvellement infectés.

Notifications received under the International Sanitary Regulations relating
to infected local areas and to areas in which the presence of quarantinable
diseases was reported (see page 414).

■ = Areas notified under Article 3 on the date indicated.

Other areas in which the presence of quarantinable diseases was notified
under Articles 4, 5 and 9 (a):

A = during the period indicated under the heading of each disease;
B = prior to the period indicated under the heading of each disease;
* = newly infected areas.

NOTES SUR LES UNITÉS GÉOGRAPHIQUES — NOTES ON GEOGRAPHIC AREAS

Il ne faudrait pas conclure de la présentation adoptée dans le *Relevé épidémiologique hebdomadaire* que l'Organisation Mondiale de la Santé admet ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.

The form of presentation in the *Weekly Epidemiological Record* does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.

Vaccination certificates issued by this centre will bear the stamp of the Department of National Defence, Medical Services.

**CRITÈRES APPLIQUÉS POUR LA COMPILATION DE LA LISTE
DES TERRITOIRES INFECTÉS**

Conformément au Règlement sanitaire international (tel qu'il a été amendé par les Règlements additionnels de 1955, 1956 et 1963), les critères suivants sont appliqués pour la compilation et la mise à jour de la liste des territoires infectés:

- I. Un territoire ou une circonscription est porté sur la liste lorsque l'Organisation a reçu:
 - i) une déclaration d'infection, aux termes de l'article 3;
 - ii) notification d'un premier cas de peste, de choléra, de fièvre jaune ou de variole qui n'est ni un cas importé ni un cas transféré;
 - iii) notification de l'existence de la peste parmi les rongeurs, à terre ou à bord d'engins flottants qui font partie d'une installation portuaire;
 - iv) notification de l'activité du virus amaril chez des vertébrés autres que l'homme, déterminée par l'application de l'un des critères suivants:
 - a) découverte des lésions spécifiques de la fièvre jaune dans le foie de vertébrés de la faune indigène du territoire ou de la circonscription; ou
 - b) isolement du virus de la fièvre jaune chez n'importe quel vertébré de la faune indigène;
 - v) notification d'une épidémie de typhus ou de fièvre récurrente [le terme épidémie s'entend de la présence d'au moins deux cas, qui ne sont ni des cas importés ni des cas transférés, dans une circonscription pendant une période de quatre semaines (typhus) ou de trois semaines (fièvre récurrente)].
- II. Les territoires ou circonscriptions sont radiés de la liste dans les conditions suivantes:
 - i) si le territoire ou la circonscription a été déclaré infecté (article 3) il est radié de la liste lorsque l'Organisation reçoit une notification faite en application de l'article 6, suivant laquelle le territoire ou la circonscription est indemne d'infection. Si l'on dispose de renseignements indiquant que le territoire ou la circonscription n'a pas été indemne d'infection pendant une période correspondant à la durée indiquée dans l'article 6, la notification prévue par l'article 6 n'est pas publiée, le territoire ou la circonscription reste sur la liste et l'administration sanitaire intéressée est priée de donner des éclaircissements quant à la situation exacte;
 - ii) si le territoire ou la circonscription a été porté sur la liste pour des raisons autres que la réception de la notification prévue par l'article 3 (voir I. ii) à v) ci-dessus), il est radié de la liste lorsque des rapports hebdomadaires négatifs ont été reçus pendant une période dont la durée est indiquée à l'article 6. A défaut de tels rapports, le territoire ou la circonscription est radié de la liste lorsque, au terme de la période indiquée à l'article 6, l'Organisation reçoit une notification d'exemption d'infection (article 6).

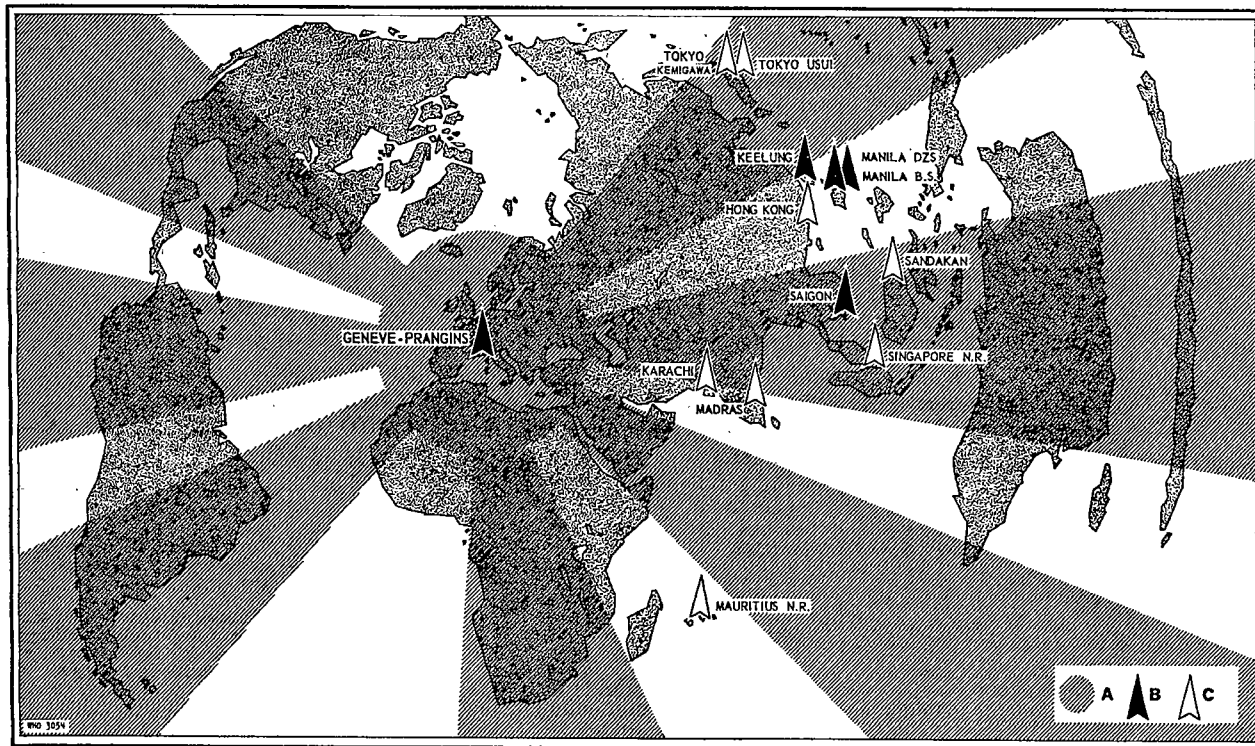

**CRITERIA USED IN COMPILING THE INFECTED
AREA LIST**

Based on the International Sanitary Regulations (as amended by Additional Regulations of 1955, 1956 and 1963) the following criteria are used in compiling and maintaining the infected area list:

- I. An area is entered in the list on receipt of information of:
 - (i) a declaration of infection under Article 3,
 - (ii) the first case of plague, cholera, yellow fever or smallpox that is neither an imported case nor a transferred case;
 - (iii) plague infection among rodents on land or on craft which are part of the equipment of a port;
 - (iv) activity of yellow-fever virus in vertebrates other than man using one of the following criteria:
 - (a) the discovery of the specific lesions of yellow fever in the liver of vertebrates indigenous to the area; or
 - (b) the isolation of yellow-fever virus from any indigenous vertebrates;
 - (v) an epidemic of typhus or relapsing fever [an epidemic is interpreted to mean the occurrence of two or more cases which are neither imported nor transferred cases in a local area during a four-week (typhus) or a three-week (relapsing fever) period].
- II. An area is deleted from the list on receipt of information as follows:
 - (i) if the area was declared infected (Article 3), it is deleted from the list on receipt of a declaration under Article 6 that the area is free from infection. If information is available which indicates the area has not been free from infection during the time intervals stated in Article 6, the Article 6 declaration is not published, the area remains on the list and the health administration concerned is queried as to the true situation;
 - (ii) if the area entered the list for reasons other than a declaration under Article 3 (see I. (ii) to (v) above), it is deleted from the list on receipt of negative weekly reports for the time intervals stated in Article 6. In the absence of such reports, the area is deleted from the list on receipt of a notification of freedom from infection (Article 6) when at least the time period given in Article 6 has elapsed since the last notified case.

BULLETIN ÉPIDÉMIOLOGIQUE RADIO-TÉLÉGRAPHIQUE QUOTIDIEN DE L'OMS
 DAILY EPIDEMIOLOGICAL RADIO-TELEGRAPHIC BULLETIN OF WHO

L'Organisation mondiale de la Santé, à Genève, transmet par l'intermédiaire des postes émetteurs de Radio Suisse S.A. (Genève-Prangins), un *Bulletin épidémiologique radio-télégraphique quotidien* destiné aux administrations sanitaires. Ce bulletin contient les renseignements officiels reçus par l'OMS, à Genève, sur les cas de maladies quaranténaires, c'est-à-dire de peste, choléra, fièvre jaune, variole, typhus et fièvre récurrente, constatés dans les ports et les aéroports (section une); sur les déclarations de circonscriptions infectées; sur les déclarations de circonscriptions redevenues indemnes lorsqu'il s'agit (a) d'un port ou d'un aéroport; (b) de la dernière circonscription qui restait encore infectée par une maladie quarantenaire donnée, dans un pays (section deux); sur les cas de maladies quaranténaires constatés dans des localités autres que ports et aéroports (section trois); et enfin sur les épidémies de maladies non quaranténaires ayant un intérêt international suffisant (section quatre).

Les derniers renseignements reçus suivis des mots « fin des dernières informations » sont communiqués au début du message, afin de réduire les frais de réception des administrations sanitaires. Lorsqu'il n'y a pas de changement, le mot « répétition » précède le texte du bulletin.

Le bulletin est un complément au *Relevé épidémiologique hebdomadaire*.

Les conditions de réception du bulletin, ainsi que toutes observations et suggestions opportunes au sujet de sa teneur, seront signalées au Service de la Quarantaine internationale, OMS, Genève (adresse télégraphique: EPIDNATIONS GENÈVE).

Les postes émetteurs de Genève-Prangins qui transmettent le *Bulletin épidémiologique radio-télégraphique de l'OMS*, de même que les postes émetteurs retransmettant ce Bulletin, sont indiqués à la page 416.

The World Health Organization transmits over the Radio Suisse S.A. wireless station (Genève-Prangins) a *Daily Epidemiological Radio-telegraphic Bulletin* destined for health administrations. This bulletin contains official information received by WHO in Geneva on the occurrence of the quarantinable diseases, i.e. plague, cholera, yellow fever, smallpox, typhus and relapsing fever, in ports and airports (section one); on declarations of areas as infected or free from infection—declarations of areas free from infection are included only if (a) the area is a port or airport, or (b) the area is the last infected area for that particular disease in that country (section two); on cases of the quarantinable diseases in localities other than ports and airports (section three); and on outbreaks of non-quarantinable diseases if of sufficient international interest (section four).

The "latest information", followed by the words "end of latest information" is given at the beginning of the message, in order to reduce the cost of reception to health administrations. Whenever the text is not modified the word "repetition" is given at the beginning of the message.

The Bulletin complements the *Weekly Epidemiological Record*.

Reports on condition of reception, and any comments and suggestions regarding the contents of the bulletin, should be communicated to the International Quarantine Service, WHO, Geneva (cable address: EPIDNATIONS GENÈVE).

The Genève-Prangins stations transmitting the *Daily Epidemiological Radio-telegraphic Bulletin of WHO*, as well as those stations retransmitting this Radio Bulletin, are listed on page 416.
