RELEVÉ ÉPIDÉMIOLOGIQUE HEBDOMADAIRE WEEKLY EPIDEMIOLOGICAL RECORD

Notifications et informations se rapportant à l'application
 du Règlement sanitaire international et notes relatives à la
 fréquence de certaines maladies

Service de la Quarantaine internationale
 Adresse télégraphique: EPIDNATIONS GENÈVE

Notifications under and information on the application of the
 International Sanitary Regulations and notes on current incidence
 of certain diseases

International Quarantine Service
 Telegraphic Address: EPIDNATIONS GENEVA

16 SEPTEMBRE 1966

41^e ANNÉE — 41st YEAR

16 SEPTEMBER 1966

MALADIES QUARANTENAIRES — QUARANTINABLE DISEASES

Territoires infectés au 15 septembre 1966 — Infected areas as on 15 September 1966

Notifications reçues aux termes du Règlement sanitaire international
 concernant les circonscriptions infectées ou les territoires où la présence
 de maladies quaranténaires a été signalée (voir page 476).

■ = Circonscriptions ou territoires notifiés aux termes de l'article 3 à la
 date donnée.

Autres territoires où la présence de maladies quaranténaires a été notifiée
 aux termes des articles 4, 5 et 9 a):

A = pendant la période indiquée sous le nom de chaque maladie;
 B = antérieurement à la période indiquée sous le nom de chaque maladie;
 * = territoires nouvellement infectés.

Notifications received under the International Sanitary Regulations relating
 to infected local areas and to areas in which the presence of quarantinable
 diseases was reported (see page 476).

■ = Areas notified under Article 3 on the date indicated.

Other areas in which the presence of quarantinable diseases was notified
 under Articles 4, 5 and 9 (a):

A = during the period indicated under the heading of each disease;
 B = prior to the period indicated under the heading of each disease;
 * = newly infected areas.

INFORMATIONS ÉPIDÉMIOLOGIQUES

VARIOLE

Asie

Indonésie. — Par télégramme du 6 septembre, une épidémie de variole a été signalée dans l'île de Bali. 944 cas ont été observés jusqu'au 20 août. La variole n'avait pas été notifiée à Bali depuis plus de 15 ans.

GRIPPE

Amérique

Panama (information en date du 23 août 1966). — Pendant les six dernières semaines, un nombre accru d'affections des voies respiratoires supérieures s'est produit dans la République de Panama ainsi que dans la Zone du Canal. Deux souches de virus grippal A ont été isolées chez des malades.

Océanie

Australie (information complémentaire en date du 6 septembre). — Les cas d'affections d'allure grippale signalés dans le *Relevé* N° 34, page 451, furent relativement bénins; la plupart des patients s'absentèrent de leur travail pendant deux ou trois jours au plus. Il n'y eut qu'une légère augmentation du nombre des décès par pneumonie. L'épidémie est en régression, mais des cas sont encore signalés.

Le taux d'atteinte global n'est pas connu; toutefois, dans quelques écoles, l'absentéisme s'est élevé à 15%.

EPIDEMIOLOGICAL NOTES

SMALLPOX

Asia

Indonesia. — By cable of 6 September, an epidemic of smallpox has been reported in Bali Island. 944 cases were observed up to 20 August. Smallpox had not been notified in Bali for at least 15 years.

INFLUENZA

America

Panama (information dated 23 August 1966). — During the past six weeks, there has been an increased number of upper respiratory illnesses in the Republic of Panama, as well as in the Canal Zone. Two strains of influenza Virus A were isolated from patients.

Oceania

Australia (complementary information dated 6 September). — The cases of influenza-like diseases reported in *Record* No. 34, page 451, have been relatively mild and in most instances patients have not been absent from work for more than two or three days. There has been only a slight increase in the number of deaths from pneumonia. The epidemic is now past its peak but cases are still occurring.

No accurate figures are available on the overall infection rate but absenteeism reached 15% in some schools.

BULLETIN ÉPIDÉMIOLOGIQUE RADIOTÉLÉGRAPHIQUE QUOTIDIEN DE L'OMS DAILY EPIDEMIOLOGICAL RADIOTELEGRAPHIC BULLETIN OF WHO

L'Organisation mondiale de la Santé transmet par l'intermédiaire des postes émetteurs de Radio Suisse S. A. à Genève-Prangins (Suisse) un *Bulletin épidémiologique radiotélégraphique quotidien*. Ce bulletin contient des renseignements officiels reçus par l'OMS, à Genève, sur les cas de maladies quaranténaires (c'est-à-dire de peste, choléra, fièvre jaune, variole, typhus et fièvre récurrente) constatés dans le monde, et, occasionnellement, d'autres renseignements. Il comprend les sections suivantes:

Section une — cas de maladies quaranténaires dans les villes attenantes à un port ou à un aéroport, y compris la zone du port ou de l'aéroport, sauf indication contraire;

Section deux — déclarations par les administrations sanitaires de circonscriptions infectées ou indemnes d'infection. Une circonscription déclarée indemne d'infection ne figure que s'il s'agit: a) d'une circonscription comportant une ville attenante à un port ou à un aéroport; ou b) de la dernière circonscription encore infectée par une maladie donnée dans le pays;

Section trois — a) cas de maladies quaranténaires ayant une signification épidémiologique particulière, observés dans des territoires autres que des villes de port ou d'aéroport; b) cas de maladie quarantenaire, importé(s) ou transféré(s) dans une ville de port ou d'aéroport.

Le bulletin comporte occasionnellement une quatrième section:

Section quatre — a) renseignements sur des poussées de maladies non-quaranténaires ayant une importance épidémiologique internationale; b) renseignements nouveaux et importants relatifs au Règlement sanitaire international, qui ne sont pas compris dans les sections une, deux et trois.

Les informations reçues au cours des 24 heures précédentes sont données au commencement du bulletin. Elles sont suivies des mots « fin dernières informations ». Lorsqu'aucune information nouvelle n'a été reçue et que, par conséquent, le contenu du bulletin est le même que le jour précédent, le bulletin commence par le mot « répétition ».

Le bulletin est un complément du *Relevé épidémiologique hebdomadaire*.

Les conditions de réception du bulletin, ainsi que toutes observations et suggestions au sujet de sa teneur, peuvent être signalées au Service de la Quarantaine internationale, OMS, Genève (adresse télégraphique: EPIDNATIONS GENÈVE).

Les postes émetteurs de Genève-Prangins qui transmettent le *Bulletin épidémiologique radiotélégraphique de l'OMS*, de même que les postes émetteurs retransmettant ce bulletin, sont indiqués à la page 480.

The World Health Organization transmits a *Daily Epidemiological Radiotelegraphic Bulletin* over the Radio Suisse S.A. wireless station at Genève-Prangins (Switzerland). This Bulletin contains official information received by WHO in Geneva on the occurrence of the quarantinable diseases (viz. plague, cholera, yellow fever, smallpox, typhus and relapsing fever) throughout the world and occasionally other information. It is divided into sections as follows:

Section One — cases of quarantinable diseases in cities adjacent to a port or airport including the port or airport area unless otherwise indicated;

Section Two — declarations by health administrations of areas infected or free from infection. A declaration that a local area has become free from infection is included only if (a) the local area includes a city adjacent to a port or airport; or (b) the area is the last infected local area for that particular disease in that country;

Section Three — (a) cases of quarantinable diseases of particular epidemiological significance in areas which are not port or airport cities; (b) imported or transferred case(s) of a quarantinable disease in a port or airport city.

Occasionally, the Bulletin contains:

Section Four — (a) information on outbreaks of non-quarantinable disease of international epidemiological significance; (b) important new information related to the International Sanitary Regulations not included in sections one, two and three.

In the Bulletin, the information received in the previous 24 hours is given at the beginning. This latest information is concluded by the words "end latest information". When no new information has been received and therefore the content of the Bulletin is the same as the previous day, the word "repetition" is given at the beginning of the message.

The Bulletin complements the *Weekly Epidemiological Record*.

Reports on conditions of reception, and any comments or suggestions regarding the contents of the Bulletin, should be sent to the International Quarantine Service, WHO, Geneva (cable address: EPIDNATIONS GENÈVE).

The Genève-Prangins stations transmitting the *Daily Epidemiological Radiotelegraphic Bulletin* of WHO, as well as those stations retransmitting this Radio Bulletin, are listed on page 480.

Explication des symboles — Explanation of symbols

■ Circonscription notifiée aux termes de l'article 3 du Règlement sanitaire international comme infectée à la date donnée.

Area notified under Article 3 of the International Sanitary Regulations as an infected local area on the date indicated.

□ Circonscription notifiée aux termes de l'article 6 du Règlement sanitaire international comme indemne à la date donnée.

Area notified under Article 6 of the International Sanitary Regulations as free from infection on the date indicated.

Ville X (A) Ville X et l'aéroport de cette ville.
City X (A) City X and the airport of that city.

Ville Y (P) Ville Y et le port de cette ville.
City Y (P) City Y and the port of that city.

Rangoon (PA) signifie la ville de Rangoon avec son port et son aéroport.
Rangoon (PA) means the city of Rangoon with its port and its airport.

Ex.: Karachi (PA) (excl. A) signifie la ville de Karachi avec son port (mais sans son aéroport).
Karachi (PA) (excl. A) means the city of Karachi with its port (but without its airport).

A = Régions desservies par les stations de Genève-Prangins. — Areas reached by Geneva-Prangins Station.
 B = Stations avec émissions quotidiennes. — Stations transmitting daily.
 C = Stations émettant une ou deux fois par semaine. — Stations transmitting once or twice a week.

NOTES SUR LES UNITÉS GÉOGRAPHIQUES — NOTE ON GEOGRAPHIC AREAS

Il ne faudrait pas conclure de la présentation adoptée dans le *Relevé épidémiologique hebdomadaire* que l'Organisation Mondiale de la Santé admet ou reconnaît officiellement le statut ou les limites des territoires mentionnés. Ce mode de présentation n'a d'autre objet que de donner un cadre géographique aux renseignements publiés. La même réserve vaut également pour toutes les notes et explications relatives aux pays et territoires qui figurent dans les tableaux. Les « circonscriptions » (voir définition de ce terme dans le Règlement sanitaire international) sont présentées suivant les notifications reçues des administrations sanitaires.

The form of presentation in the *Weekly Epidemiological Record* does not imply official endorsement or acceptance by the World Health Organization of the status or boundaries of the territories as listed or described. It has been adopted solely for the purpose of providing a convenient geographic basis for the information herein. The same qualification applies to all notes and explanations concerning the geographic units for which data are provided. Local areas under the International Sanitary Regulations are presented as designated by health administrations.
